

Profile

I am a computer graphic artist with a experience in both 3D animation for video production and print related graphic design, utilizing such software as Adobe Photoshop, Illustrator, and Lightwave 3D.

My proudest achievement in this field was the creation of a book of illustrations based on the television program 'The Prisoner', published by Titan Books in London, England. I've also designed a tabletop game that was recently pitched to Hasbro toys in Los Angeles.

My initial educational background was in film, specializing in cinematography and lighting. I worked for 2 years as a camera assistant in live action films and television including The X-Files and Free Willy 3. Since then I have been putting my creative efforts to work in illustration, computer graphics, and photography.

- keen eye for detail
- ability to work in rapport with team members to create a visually pleasing and comprehensive product
- analytical, with sound common sense
- history of creative problem solving

Software

Newtek Lightwave 3D

Adobe Photoshop

Adobe Illustrator

Macromedia Freehand
